Trivec TMC400QS Sprayer Machine

TECHNIQUES FOR SURFACE FINISHING

Trivec has an extensive range of machines for pre finishing. Pre finishing comprises one or more combined treatments like texturing, aging and finishing with reactives, stains, oils, hardwax or lacquers. Trivec is not only specialized in turn-key finishing lines, but also in custom built machines, stand alone machines for laboratory purposes and units for integrating into existing machine lines like infrared pre heating panels, polishing units, LED and UV curing equipment.

Trivec also supplies roller conveyors, belt conveyors, cross conveyors, automatic feeding machines, drying solutions, packaging techniques and environmental friendly solutions for equipment cleaning.

COATING SOLUTIONS
Trivec TRV450C Roller Coater

Highlighted: Trivec roller coaters

Smart, accurate and very efficient. Trivec Roller Coaters are equipped with high precision doctor roller technique which makes it possible to apply a very even layer of UV, UV-LED or oxidative oil, hardwax, stain and (UV) lacquer. With the available setting options, the required number of grams can be set precisely. The reverse unit on the double coater applies products deep into the wood structure ensuring a perfect finish or for creating special effects. For changing roller type or for cleaning purposes, rollers can be removed quickly without the help of tools.

SOLUTIONS FOR SURFACE IMPROVEMENTS

Which **solutions** are you looking for?

COATING SOLUTIONS

Roller Coating, spraying, curtain coating, vacuum coating, multi side brush coating, edge coating.

SURFACE SOLUTIONS

Brushing, scraping, aging, band saw texturing, sanding, special effects.

GLUING SOLUTIONS

Single or double side glue application, pressing machines for beams, panels and parquet flooring.

DRYING SOLUTIONS

UV and UV/LED curing, combi drying, pre heating, hot air and IR drying.

PRODUCT HANDLING SOLUTIONS

Automatic in feed systems, roller and belt conveyors, cross conveyors, drying racks and packaging.

ECO SOLUTIONS

Brush and roller washing, equipment for purifying waste water of glue and paint, eco cleaning agents.

Highlighted: Creating new finishes

Goal is to create special texture effects using Trivec Surface technology tools and equipment. Combining surface and coating techniques leads to new and unique finishes.

Band saw

Brushed surface

Hand scraped

Trivec DB400CCB1 Cross Cutter

SURFACE SOLUTIONS
Trivec TRV270SC Scraper

New introduction:

Trivec Sprayer Machine

- Trivec Modular Concept (TMC)
- Easy spray cabin access
- Suitable for all sorts of spray equipment
- Applying lacquers, paints and stains
- Adjustable air recirculation system
- Touch screen controlled

Trivec

TMC CONCEPT

All about strategic innovation and adding value

At Trivec machines are developed on the basis of practical challenges and experiences. What are the characteristics of your project? Which space is available? Which capacity is needed? What is needed now and what are your future plans? From stand-alone unit to far-reaching automation. A modular concept that easily grows with the development of your business.

The result? You can test it yourself at the Trivec Experience Centre ▾
